Subject: M6H1 – Harvey Response: - Update City of Beaumont
Date: Thursday, September 7, 2017 10:58:55 AM

José Rodriguez arrived at the Region 10 TCEQ office and is sitting there with the Lt Ian Taylor (Texas State Guard), Kim Willis-Burr (EPA R7), Jack Schulze (TCEQ retired but still part of optimization program) plus one other person from TCEQ.

TCEQ did get into the treatment plant yesterday afternoon. The CFE looks good, they have been able to start using their original pumps, etc. José did hear that they have the lead in assessing the cities DW wells (we think that came from USACE). Since they do not have definitive permission from the city they are waiting. I gave them our USACE contact who is paired with the FEMA staff in the Houston office. So José can contact them directly for better information to hopefully get this moving.

USACE Contact: Corey Koger (916) 879-5457

Thanks,

Mark McCasland
